

Bacterial/Viral/Protist Disease Cereal Box Project

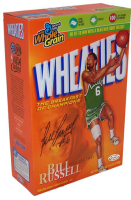

Student Name: _____

Due Date: _____

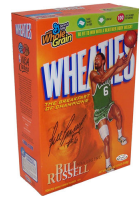

In this project, you will use a cereal box to present specific information about a disease that is caused by a bacterium, a virus or a protist.

- Your project **must** be presented on the outer surfaces of an ordinary cereal box (11 ounces or more), with your name printed on the bottom right corner of the front of the box.
- **FRONT OF BOX** - Your project **must** contain the following information on the front of the cereal box:
 1. Common name of disease, presented in a catchy cereal slogan (i.e. "Shredded Swine Flu").
 2. A picture (drawn or printed from a computer) of the pathogen that causes the disease.
 3. Bacteria, Virus or Protist printed in LARGE type in the bottom left corner.
 4. Your name printed in the bottom right corner.
- **SIDE A OF BOX** - You must **choose any 7** of the following options to include on one side of your cereal box:
 1. Scientific name of the pathogen that causes the disease.
 2. Date that the disease was first documented.
 3. Date that the pathogen that causes the disease was first discovered.
 4. Name of the scientist(s) who discovered the pathogen that causes the disease.
 5. Country of origin.
 6. Method of transmitting the disease.
 7. Symptoms of the disease.
 8. Treatment of the disease.
 9. Number of people affected by the disease.
 10. Mortality (death) rate of the disease.
 11. Incubation period.
- **SIDE B OF BOX** – You must include 5 "Fun Facts" about your disease. Examples of Fun Facts may include the names and pictures of celebrities stricken by the disease or historical facts about the disease.
- **BACK OF BOX** – You must create a cereal box puzzle using information about your disease. You may create (but are not limited to) a crossword puzzle, word scramble, maze or word search. You may create your puzzle on your own or utilize online puzzle makers to help you with this portion of the project. Suggested sites include:
