Period: _____

The Rock Cycle: *Metamorphic Rocks*

Answer the following questions using the outline completed in class.

1. Most of the states of Maine, Vermont, Massachusetts and New Hampshire show metamorphic rocks at the surface. What kind of metamorphism is responsible for this?

2. Some of the highest buildings in the world are built on metamorphic rock. Why?

3. Would an automobile manufacturer be interested in buying land with metamorphic rock on it as a source for materials to make cars? Why or why not?
