

Name: _____

Date: _____

Life Science

Period: _____

Unit One

So Many Scientists!

Match the type of scientist (on the left) with what they study (on the right).

Scientist	Topic of Study
_____ 1. Audiologist	A. The heart
_____ 2. Archaeologist	B. Blood and blood-producing organs
_____ 3. Astronomer	C. Earthquakes
_____ 4. Biologist	D. Fungi (mushrooms, mold, yeast)
_____ 5. Botanist	E. Outer space (planets, stars, galaxies)
_____ 6. Cardiologist	F. Insects
_____ 7. Chemist	G. The ocean
_____ 8. Ecologist	H. Organisms and their environment
_____ 9. Embryologist	I. The development, diagnosis, treatment, and prevention of tumors
_____ 10. Entomologist	J. Animals
_____ 11. Geneticist	K. Weather and atmospheric conditions
_____ 12. Geologist	L. Hearing
_____ 13. Hematologist	M. The properties and effects of water on Earth
_____ 14. Histologist	N. Plants
_____ 15. Hydrologist	O. The composition, structure, properties, and reactions of matter
_____ 16. Ichthyologist	P. Fish
_____ 17. Meteorologist	Q. The formation, early growth, and development of living organisms
_____ 18. Microbiologist	R. Poisons and the treatment of poisoning
_____ 19. Mycologist	S. The origin, history, and structure of the earth
_____ 20. Neurologist	T. Past human lives by examining remaining material evidence
_____ 21. Oceanographer	U. Microorganisms and their effects on other living organisms
_____ 22. Oncologist	V. Heredity and inherited traits
_____ 23. Seismologist	W. The nervous system and disorders affecting it
_____ 24. Toxicologist	X. Life and living things
_____ 25. Zoologist	Y. The microscopic structure of animal and plant tissues
